

Conference Abstract

## 3<sup>rd</sup> The Holy Quran & Science Conference and Exhibition - 2016

1194 Matheson Blvd E Mississauga, ON L4W 1Y2 Canada

Conference Abstract

### IRRIGATION ADVISORY SERVICES FOR FARMERS OF PAKISTAN SCIENCE IN SERVICE OF MANKIND

**Sohail Zakiuddin Husain**

**Subtitle:** Prevent Pancreatic Inflammation /dur to an Endoscopic Procedure

#### Speakers Profile

Dr. Husain is an Associate Professor of Pediatric Gastroenterology at the University of Pittsburgh. His research focuses treating pancreatitis, which is a painful, inflammatory pancreatic disease. Dr. Husain has published over 55 scientific papers and holds two large independent research grants from the NIH. He also serves as a standing NIH study section member, Chair of a major GI abstract committee, Vice-Chair of the Pancreas Committee of the North American Pediatric GI Society, and Co-Director of the Pittsburgh Pediatric Pancreatic Program. On a Jamaat level, Dr. Husain serves as President of the USA Ahmadiyya Muslim Scientists.

#### Abstract

A novel strategy to prevent pancreatic inflammation due to an endoscopic procedure called an ERCP. There is a pressing need to develop effective preventative therapies for post-ERCP pancreatitis (PEP). We recently published that early PEP events are induced through the activation of a calcium-activated phosphatase called calcineurin and that global deletion of calcineurin abolishes PEP in a mouse model. A crucial question is whether calcineurin within the pancreas itself controls the initiation of PEP. We now show, using two complementary genetic approaches, that PEP is dependent on calcineurin produced by the main cells of the pancreas called acinar cells and that calcineurin inhibitor medications, infused within the radiocontrast given during ERCP, can largely prevent PEP. These results provide impetus for launching clinical trials to test the efficacy of this novel delivery of calcineurin inhibitors to prevent PEP.
