Consent for publication: Author is agreed to submit this abstract for publication in this research journal.

Availability of data and materials: The information and data collected and/ or incorporated in this study is included in this manuscript.

Key words: Cosmology, Quran

Abstract

Cosmology is a subject that has been a topic of high interest from the beginning of history. Almost all religions, philosophies and mythologies have discussed cosmology in some way. Holy Quran has the unique distinction of opening up this topic and providing very concrete facts about the origin and make of the universe, galaxies, stars and planets, as well as how the whole system is working and where is it leading.

This paper introduces the topic from some discussion done by Hadhrat Mirza Tahir Ahmad (aba), in his book 'Revelation, Rationality, Knowledge and Truth', and takes it further, exploring some latest discoveries and what does the Holy Quran says about these discoveries. One such discovery is the concept of nothingness. i.e. the universe was created from nothing.
